

Mr. Dubé, Mr. Carmant, Ms. Bélanger, Ms. Biron, the health of women with disabilities is important to us. As part of the “My breasts and my uterus count too!” , we ask that all public or private health establishments across Quebec administering prevention services, diagnosis and treatment specific to women such as mammograms, gynecological examinations, oncological and perinatal care are accessible from the parking lot, travel areas as well as changing rooms, examination rooms, adapted equipment, etc. We also ask that these establishments provide qualified staff with real knowledge of their specific needs and their own reality. We ask that staff be trained and available in order to provide a kind welcome as well as to ensure their safety and dignity when they need to mobilize their bodies.

These are issues of dignity, equity and social justice!
